I joined Schjødt in 2020 through the merger with Hamilton Advokatbyrå, which I joined in 2012. I primarily work in the Real Estate department, in which I mainly work with commercial lease and related issues (for example drafting and reviewing lease agreements, and issues regarding termination of lease agreements and change of terms) combined with advise on special real estate law such as planning and building law, development projects and environmental law.

Furthermore, I have competence in the field of public procurement, with previous work experience from the administrative court of Stockholm, where I worked as a clerk; and from Hamilton Advokatbyrå, where I have been providing advice in the various stages of public procurement, prior to, during and after procurement procedures, including court proceedings.
